

UN HOUSE SECURITY

**From:** EUPM Security Adviser and UN House Security Officer  
Da Costa Sousa, Jose Luis

**Subject:** Letter of Recommendation regarding UNILAB

- 01. UNILAB** has been, basically, the only local company, selected through technical and very demanding tenders and cleared regarding trustworthiness through all the available means, to install and maintain all the electronic security systems in the so called UN House, where 3 International Organizations have their Main Headquarters.
- 02. UNILAB** have installed, from 2003, not only in the UN House Compound but also in some EUPM Field Offices, all different types of electronic security systems, ranging from normal alarm systems against intruders, to sophisticated electronic access control systems and video surveillance systems to Secure Voice Rooms, etc.
- 03.** After the installation of the above mentioned systems, either through the period of guarantee or after it, the UNILAB response to any need of repair or maintenance has been always done immediately on time and with efficiency.
- 04.** I have been working with UNILAB from NOV 2003 as the Officer in charge of the Security of the UN House and EUPM and I strongly recommend UNILAB as very reliable under all points of view, either technical or not.
