UNILAB d.o.o.

TO WHOM IT MAY CONCERN

I confirm that we at United Nations Development Programme in Bosnia and Herzegovina have been using UNILAB d.o.o. services since 2001. UNILAB provides technical and physical protection security services for UNDP premises and residences.

During this time they have provided us with different products and services in the area of technical and physical security. These activities would usually include installation and maintenance of different fire, ant-intruder and video surveillance systems.

Expertise and professionalism of UNILAB staff is unquestionable and always at appropriate level.

I can confidently recommend "UNILAB d.o.o." as a solid and reliable service provider in their field.

Yours faithfully,

Jasmin Osmanagic
Head of Security
